During the 12 weeks of the new playgroup sessions, families are invited to experience and explore *Metal* in various modalities. Children will be introduced to *Metal* as an object that will pique their curiosity and wonder. Through meaningful inquiry, we aim to extend children's initial understanding of *Metal* as an object they encounter daily. Using sensorial and open-ended materials linked to *Metal*, we hope to embark on a magical experience with parents and children in deconstructing the properties of this malleable material and deepening our understanding of the possibilities that *Metal* provides.

#### **Parent's Testimonial**

Since moving to Singapore my 22-month-old daughter and I have enjoyed the playgroup at Blue House Atelier with Ms Shivanti and her team. Blue House offers a beautiful, engaging and stimulating environment for the children and a great opportunity to meet other parents.

It's a fantastic first introduction to the structured play for young children. My daughter's grandmother who regularly joined sessions and is an experienced educator who has worked around the globe was particularly impressed by the team and program at Blue House. Our family wholeheartedly recommend Blue House Atelier to all!.
